

## Some Other Negative Consequences

- Since all residents will be beneficiaries, Colorado will become a **haven for the desperately ill** from all over the country and possibly all over the world, driving the estimated costs **far higher** than the original estimates.
- The excessive tax system on corporations, capital gains and rent incomes will drive many businesses **out of the state**.
- Because the Board dictates all of their election systems, is not subject to the **normal checks and balances** from other jurisdictional authorities and the rights of citizens to elect their representatives is significantly compromised by giving aliens equal voting status, Amendment 69 would create a system of government in Colorado that would more resemble a Soviet style **Politburo** than the representative, limited system of government guaranteed in our Constitution.
- This **monopoly of medical care** will force everyone's private medical records into a **central database** which Amendment 69 states will be used **"for management and research purposes."**
- **Amendment 69** assumes medical professionals will accept the **SSPS** and continue to work in Colorado.

### ***Tax Examples:***

A family of five (two parents and three children) with a self-employment income of \$50,000 and a \$15,000 income from a rental property, (using the IRS standard deductions) would have a Colorado income tax of \$1,505. Adding the 10% **SSPS** tax their Colorado tax bill would be \$8,005, **532%** more than the tax without **SSPS**.

If that same family sold their rental property and received a \$150,000 capital gain, with **SSPS** they could owe an **additional \$21,945** in Colorado taxes.

The proponents of the **SSPS** claim that this 10% tax is assessed like Social Security taxes, but the **SSPS** will tax all income sources, not just earned income, and it is applied before any individual and itemized deductions are figured.

The **SSPS** tax scheme is magnitudes bigger than any other tax set before Colorado voters.

This analysis of Amendment 69 was prepared by Colorado State Senator Kevin Lundberg.

## **Amendment 69:**

# **The State Single Payer System (SSPS)**

**It's not about Colorado...**

**It's not about care...**

**It's about control.**

The **SSPS** starts with a \$25 billion tax increase each year.  
But it gets worse...

This **10% tax** is on all gross income, business income, capital gains, and rental income. It is 10% on ALL income.  
But it gets worse...

This is **Obamacare on steroids**.  
But it gets worse...

The **SSPS** creates a new super-subdivision of government in Colorado that is accountable to no one.

*And this rogue Oligarchy is certain to get worse.*

## System of Governance

- Their budget is over **five times bigger** than what would be left of the current state general fund after the **SSPS** funds are removed from the general fund (\$7 billion vs. \$37 billion).
- Their budget would be **more than twice** the entire state budget, including cash funds and federal funds, after the **SSPS** funds were removed from the total state budget (\$17 billion vs. \$37 billion).
- The **SSPS** Board is **unaccountable**, it is “not subject to administrative direction or control by any state executive, department, commission, board, bureau or agency.”
  - Board members are not subject to **recall**, they set their **own salaries**, create their **own election districts**, and can vote any board member **“off the island.”**
  - The Board essentially **picks their own candidates** who will stand for election to the board. The election is nonpartisan and therefore the Board will determine how the **candidates are selected**, how the **election is conducted** and how the **votes are counted**.
  - All residents above the age of 18 who have been in the state for at least 12 months may vote (including all legal and **illegal aliens**).
- Amendment 69 exempts the **SSPS** from all revenue and spending limitations in the Tax Payer’s Bill of Rights (**TABOR**).

## Medical System

- The **Board** will dictate what medical care will be **approved** and what care will be **denied** for all covered medical services
- All residents within the state are required to be a part of the **SSPS**, with **no exceptions** such as medical cost sharing (an exception even allowed in ObamaCare).
- **SSPS** is a secondary payer to any health insurance. If you already have coverage, that insurance will have to pay first, even though you have to pay the **SSPS tax**.
- All providers will have to conform to the approval, pricing and billing system **established by the Board**.
- Cost containment will inevitably result in **rationing** of care and **raising co-pays**.
- Payment for all alternative medicine will be subject to the **rulings from the Board**.
- Is it possible that **SSPS** can be any more efficient and less bureaucratic than the **DMV** or the **VA hospital system**?

## Tax System

- **\$25 billion** is just the estimated starting point
- 10% tax is on:
  - All **gross income** - for employees, they pay 1/3, employer pays 2/3
  - Wages, salaries and tips
  - **Business net income**
  - Farm net income
  - **Capital gains**
  - **Pensions, annuities and Social Security benefits**, to the extent taxed by the state under current law.
- The tax is **regressive**, fully taxing lower incomes, providing some tax relief for higher incomes.
- Non-beneficiaries (**non-residents**) are still taxed on all Colorado income.
- **Tax rate increases** require a vote from the “members” (all residents over 18 who have been in the state 12 months), but **back-door increases** (increasing co-payments) can be raised by the Board without any vote.
- Since the **SSPS** is exempt from **TABOR**, the board determines the ballot language for all tax rate increase questions. (no longer will such questions begin with the phrase: “shall taxes be raised...”)
